

HOLLOW FORMS

FWS 2016

AL HOCKENBERY

Hollow forms

Shape – single most important aspect

Even wall thickness – improve drying of green wood forms

Wall thickness - gives a nice weight when held.

END GRAIN HOLLOW FORMS

FACE GRAIN HOLLOW FORM

NATURAL EDGE BOWL AMERICAN BEECH

HOLLOW FORM

WALNUT BURL 1999

Center the sapwood

Pick pretty wood – cherry burl

SENSE OF VOLUME

Figured maple

PITCHER LIP

Rip the log section so that the feature for the opening is at the top of the blank

Mark the center of the opening and drill a 1.25" diameter hole into solid wood below the bark

Drive the spur center into the wood with the spurs oriented at 45 degrees to the long grain/
